Eligibility:

- Life Members
- Provisional Members of AIOTA
- Non –Member OT's graduated from AIOTA accredited institutions

Intake :
50

INTRODUCTION:

Continuing Occupational Therapy Education organized by Academic Council of OT for members of AIOTA and also non-member OT professionals qualified from AIOTA accredited institutions; is intended to provide planned & organized learning activities designed to maintain, improve, or expand knowledge and skills to develop new knowledge and skills relevant to the enhancement of practice, education, or theory to improve the safety and welfare of the patients in hospitals institutions and private set ups. With the advent of technological advances and the expanded role, the occupational therapy is embracing new technology and interventions to adopt use of Physical Agent Modalities in an effort to occupational performance in clients. UP Branch of AIOTA in collaboration with ACOT has earlier organized continuing education on PAMOT in 2001 (Lucknow) and 2002 (New Delhi). Santosh OT College Ghaziabad had proud privilege to organize this event in association with UPAIOTA in Dec. 2012 (Delhi), April 2016 (Ghaziabad), Dec.2017 (New Delhi). And now the PAMOT-Sixth, once again is being convened by Santosh OT College at GIPMER, New Delhi:

The Advance course on Physical Agent Modalities recommended by NBCOT, USA and other overseas boards is directed towards rendering training in physical modalities as an adjunctive treatment method in patients exclusively for functional outcome. However the exclusive use of PAMs as a treatment method during a treatment session without application to a functional outcome is not considered occupational therapy. It may be included into an OT treatment plan only when they are essentially required to prepare the patients for better performance in participation in work, leisure and recreational activities. AIOTA asserts that only those occupational therapists will be authorized to the use of PAMs; who have successfully attained prescribed theory & practical sessions necessary for the safe and appropriate use through COTE on PAMOT organized by ACOT (AIOTA 2001).

OBJECTIVE :

Certificate Course on use of PAMs as an Adjunct to OT is in form of three days course with theoretical sessions, practical demonstrations and case presentations followed with assessment of performance of participants for certification. It is exclusively designed to educationally enrich the practicing occupational therapists with specialized learning and training to use PAMs within the scope of their clinical practice: ie to be used only as an adjunct to or in preparation of the patients to enhance their functional performance and activities in all walks of life.

EXPERT FACULTY:

Academic Oration, demonstration and practical sessions: by eminent professionals from physiology, physiotherapy and bio-engineering & US trained Occupational Therapist
